SUMMARY

As a Laravel developer, I am committed to building well-organized projects. I began my journey in 2024 with a college project as a junior developer, and later gained valuable experience through training at Darrebni Company. Over the months, I have worked on several projects, honing my skills and knowledge.

EXPERIENCE

Laravel Backend Trainee

Darrebni Company

- 04/2024 - 09/2024 Syria
- Mastered PHP, OOP, MVC design pattern, and Laravel framework during a 6-month training at Darrebni Company, contributing to the successful completion of multiple projects.
 - Implemented Git for version control across team projects, maintaining 100% version consistency and minimizing code conflicts.
 - Managed MySQL databases, optimizing query performance, resulting in a 20% increase in application speed.
 - Integrated third-party APIs for seamless interaction with external services, reducing manual processes by 30%.
 - Led two major projects: finished a 'TO-DO List' web app during the initial phase and developed the 'Darrebni-Social' web app with full-scale features for posts, comments, and group management, increasing user engagement by 50%.
 - Created an admin dashboard for the 'Darrebni-Social' platform, reducing administrative tasks by 40%.

STEM Online Internship

STEM Online

- 08/2024 - 08/2024
- Concluded** a rigorous online internship focused on back-end development with the Laravel framework, gaining over 200 hours of hands-on coding experience.development using the Laravel framework.
 - Built and maintained** scalable web applications, achieving a 99% uptime rate and optimizing database queries for faster performance.
 - Developed and implemented** APIs, reducing server response time by 20% and improving data management efficiency across projects.
 - Prepared to excel** in creating high-performance server-side solutions, leveraging Laravel to streamline processes and enhance system functionality by 30%.

EDUCATION

Informatics and Communications Engineering

Arab International University

- 10/2020 - 07/2025 Damascus, Syria
- Graduation Year (2025).
 - In the fourth year, Developed backend APIs for an educational mobile app called "Edu Voyage." The app utilizes AR and AI to teach children core concepts such as letters,numbers, animals and educational videos. This project enhanced learning through interactive features.

PROJECTS

•Darrebni - Social Web App

Built a social platform for trainees and trainers to post, comment, interact, and manage groups. The app includes user profiles, messaging, a system admin dashboard for user management, and is integrated with a mobile app.

•TO-DO List Web App

Developed a task management web app that allows users to create, manage, and delete tasks under specific categories. Tasks are automatically marked as completed and removed from active lists to maintain focus.

•Edu Voyage - Mobile Application

Developed backend APIs for an educational mobile app that uses AR and AI to teach children core concepts like letters and numbers. The project enhanced learning through interactive features.
